

CIO USA TEC Safari

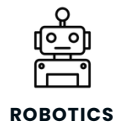

STRUCTURED INNOVATION. SCALABLE EXECUTION.

11 – 15 October 2026

San Francisco & Silicon Valley

Exclusive curated **EXECUTIVE PROGRAM** and best practices of leading US and global innovators in **San Francisco** and **Silicon Valley** showcasing cutting-edge AI technologies and business models. For CIOs who want to understand the true impact of AI, future-proof their role and turn technological disruption into sustainable value creation. Take a bold look into the future.

Technology and markets are more dynamic than ever – and AI is accelerating this change. The CIO USA TEC Safari offers a focused journey to explore how AI is reshaping IT, digital platforms, operations and strategy – and how you can leverage these developments across your enterprise.

San Francisco and Silicon Valley are at the forefront of AI research, venture capital and large-scale deployment. Experience how leading tech companies and high-growth startups experiment, scale and monetize AI and translate these insights with peers into concrete implications for your company's digital agenda and technology roadmap.

Executive value

- strategic insights into America's AI-driven innovation economy and Silicon Valley's ecosystem
- access to leading AI research institutions, labs and corporate innovation hubs
- best practices from global technology leaders
- hands-on exposure to AI applications transforming IT, operations and decision-making
- curated networking opportunities with investors, founders and C-level peers in the Bay Area

EXECUTIVE BRIEFS WITH REFERENCE CUSTOMERS
